

age	what to feed	how often	total per day
1-3 days old	4 ounces of colostrum/milk	4 X a day	12 ounces
4-6 days old	8 ounces of milk	3 X a day	24 ounces
1 week old	12 ounces of milk	3 X a day	36 ounces
2 weeks old	grass hay & water 10 ounces*	all day 3 X a day	30 ounces
3-8 weeks old	grass hay & water 10 ounces of milk grain 16% protein if able**	all day 3 X a day 2 X a day	30 ounces
9 weeks old	grass hay & water 8 ounces grain 16% protein if able	all day 3 X a day 2 X a day	24 ounces offer for 15 min.
10 weeks old	grass hay & water 8 ounces grain 16% protein if able	all day 2 X a day 2 X a day	16 ounces offer for 15 min.
11 weeks old	grass hay & water 8 ounces grain 16% protein if able	all day 1 X daily 2 X a day	8 ounces offer for 15 min.
12 weeks old	WEANED!!		

*this can vary, we usually do 12 ounces at the am & pm feedings, with 6 ounces mid day - the main thing is not to feed them over 12 ounces at any one feeding.

**we start offering our grain mix as soon as all the kids start having little pellets, we know that their stomachs are developed from eating the grass hay.
